# Folifol

## ORGANIC NITROGEN FERTILISER FLUID YEAST EXTRACT CONTAINING BROWN ALGAE

<b>ANALYSIS</b>	<b>w/w</b>	<b>g/L</b>
Organic nitrogen (N).....	6%	76.2
Organic carbon (C) of biological origin .....	25.2%	320
pH of the product: 7±0,5		
Organic matter with nominal molecular weight <50 kDa: 35%		

### ALLOWED IN ORGANIC FARMING COMPONENTS: FLUID YEAST EXTRACT CONTAINING BROWN ALGAE OBTAINED BY EXTRACTION WITH WATER

#### CHARACTERISTICS

FOLIFOL is a specialty based on vegetal compounds that supplies amino acids from enzymatic hydrolysis and natural hormones deriving from seaweed. FOLIFOL enhances tissue development, assuring a rapid and balanced vegetative growth. FOLIFOL also has a carrier effect on other nutrients.

#### METHODS OF APPLICATION AND DOSAGES

##### Foliar application:

- **Fruit trees, viticulture:** from vegetative regrowth to harvest, 5-6 applications every 8-10 days..... 2-2.5 L/ha
- **Vegetable and industrial open field crops:** from transplanting to harvest, 5-6 applications every 8-10 days .....
- **Cereals:** during the whole cycle, 1-2 applications..... 2-2.5 L/ha
- **Flower and ornamental crops:** during the whole crop cycle, every 8-10 days .....

Dosages are calculated for normal water distribution volumes.

##### Fertigation:

during the whole crop cycle, at the same interval of application

- **Fruit trees, viticulture, vegetable and industrial open field crops:** . 8-12 L/ha
- **Flower and ornamental crops:**..... 1-2 L/1000 m<sup>2</sup>

Please consult the Technical Service for application advice in specific crop and pedoclimatic conditions. The product can be mixed with all common formulations, except with products with alkaline reaction, products based on Copper and Sulphur, mineral oils and emulsions. A simple mixture test to check compatibility is advisable. The company is only liable for the composition of the product and assumes no responsibility whatsoever for damages caused by wrong/improper use of this product.
