JUMP ORGANIC

SPECIFIC ACTION PRODUCT

SOLUTION OF FILTRATED SEAWEED CREAM

ANALYSIS	p/p	g/L
Organic carbon (C) of biological origin.....	3.8%.....	39.9
Mannitol.....	0.8%.....	8.4

ALLOWED IN ORGANIC FARMING

COMPONENTS: SEAWEED PRODUCTS DIRECTLY OBTAINED BY PHYSICAL PROCESS OF GRINDING AND EXTRACTION WITH WATER AND ALKALINE SOLUTION

CHARACTERISTICS

JUMP ORGANIC is a 100% vegetal biostimulant for the growth of fruits. Thanks to its formulation based on brown seaweed cream and vegetal extracts, it stimulates cell multiplication and extension in young fruits, increasing and uniforming the size and improving the quality of the production. The brown algae contained in the formulation activate the natural fruit growth processes and bring mannitol, a molecule capable of regulating the osmotic balance in the tissues of the plant (anti-stress action) and promoting the flow of photosynthetic products towards the growing fruits.

METHODS OF APPLICATION AND DOSAGES

Foliar application:

- **Melon, watermelon, industrial tomato:** from after fruit set, 3 – 4 applications every 6-7 days..... 3 L/ha
- **Tomato, aubergine, pepper, cucumber, zucchini:** from after fruit set of the first truss, applications every 5-7 days 300 - 400 mL/hL
- **Stonefruits:** from complete petal fall, 3-4 applications every 6-7 days..... 3 L/ha
- **Pomefruit:** After thinning or natural fruit drop, 3-4 applications every 6-7

days.....3 L/ha

- **Table grape:** from after fruit set with berry 4-6 mm, 3 applications every 8-10 days
 - **under cover**2 – 2,5 L/ha
 - **open field**3 L/ha
- **Citrus:** from after fruit set, 3 applications every 15 days 3- 4 L/ha
- **Kiwi fruit:**
 - **Yellow flesh:** from complete petal fall, 3 applications every 7-8 days..3 L/ha.
With high number of fruits is suggested to make a fourth application.
 - **Green flesh:** from 7 days after complete petal fall, 3-4 applications every 7-8 days
..... 3 L/ha

We recommend using JUMP ORGANIC on plants in good water and nutritional conditions. Ensure optimal and uniform wetting on the whole plant. Dosages are calculated for normal water distribution volumes.

Please consult the Technical Service for application advice in specific crop and pedoclimatic conditions. The product can be mixed with all common formulations, except the ones containing Copper. A simple mixture test to check compatibility is advisable. The company is only liable for the composition of the product and assumes no responsibility whatsoever for damages caused by wrong/improper use of this product.

WARNING

Keep away from flames in a cool, well-ventilated place. Avoid prolonged exposure to low temperatures. Check container periodically. In case of accidental spill contain the leak, avoid water contamination and, whenever necessary, dispose according to the laws in force. SHAKE BEFORE USE
