

## Nequi

### Presentation:

1l, 5l and 20l containers

## Description

**Chitosan hydrochloride liquid extract with effect against pathogens and viruses**

## Category

Basic Substance. Chitosan aqueous extract. Product marketed in accordance with Regulation 462/2014, in accordance with Regulation (EC) No. 1107/2009 on Phytosanitary Products.

Organic Production Regulation (EU) 2018/848.  
Input certified by CAEE.

## Composition

Appearance: Light amber viscous liquid  
pH in water (1:5): 4.7  
Relative density: 1 kg/l  
Chitosan hydrochloride: 2.5% (w/w)

## Main benefits

- Decreases the incidence of: Mildew, Powdery mildew, Botrytis and other foliar fungal diseases
- Induces the accumulation of phytoalexins
- Acts as a plant stimulant, with an effect against nematodes, fungi and bacteria

## Stability

Nequi is a stable product for a minimum period of 36 months if it is kept in a cool and dry place, away from direct sunlight.

## How to use

For foliar spray applications, the dose ranges from 1 – 4 cc/l.

In applications via irrigation the recommended dose is 5 l/ha.

Repeat applications are recommended to increase effectiveness.

It can be used according to the specific conditions established (report SANCO/12388/2013).

## Other information

The product is used as a basic substance to stimulate the defense of plants and fertilizer. The information reflected in this document refers to the unaltered product, and in accordance with the manufacturer's specifications; being a guide for use and storage.

The data expressed is based on knowledge of the product up to the date of preparation of the document.
